The sequence [A341767](#) can be generalized to any base  $b > 1$ : Let  $a_b(n)$  be the number obtained by replacing each digit  $d$  in the base- $b$  representation of  $n$  with the base- $b$  digital root of  $n^d$ . The following pages contain plots of  $a_b$  for  $b \in \{2, 3, \dots, 20\}$ .
